Effects of calcination program and rehydration on palladium dispersion in zeolites NaY and 5A 155

Subject Index

Acidity

Textural, acidic and catalytic properties of niobium phosphate and of niobium oxide. Influence of the pretreatment temperature 143

Aromatics

Oxidative oligomerization of methane to aromatics 103

Arrhenius parameters

Selective oxidation of methyl α -D-glucoside on carbon supported platinum. II. Assessment of the Arrhenius and Langmuir parameters 31

Benzene

Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77

Bifunctional mechanism

Aromatization of short chain alkanes on zeolite catalysts — a Review 1

Bismuth-manganese oxide

Characterization of bismuth-manganese catalysts for methane oxidative coupling 169

Butene dehydrogenation

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. II. Epitaxy and synergy between γ -Fe₂O₃ and ferrite spinels 131

Butene dehydrogenation

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. I. Preparation of monophasic iron oxides and ferrite spinels and analysis of their mixtures 117

3,3-dimethyl-1-Butene isomerization

Textural, acidic and catalytic properties of niobium phosphate and of niobium oxide. Influence of the pretreatment temperature 143

Butene synthesis

Trans-but-2-ene is the first hydrocarbon produced in the conversion of methanol to gasoline over zeolite H-ZSM-5 69

Catalyst characterization (adsorption, STEM, cyclic voltametry, XPS)

Selective oxidation of methyl α -D-glucoside on carbon supported platinum. III. Catalyst deactivation 47

Chemisorption

Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77

Chlorine promotion

Oxidative oligomerization of methane to aromatics 103

Cyclohexene

Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77

Deactivation

Selective oxidation of methyl α -D-glucoside on carbon supported platinum. III. Catalyst deactivation 47

Dehydrogenation

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. II. Epitaxy and synergy between γ -Fe₂O₃ and ferrite spinels 131

Diffuse reflectance spectroscopy

Effects of calcination program and rehydration on palladium dispersion in zeolites NaY and 5A 155

Diffusion limitation

Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77

Dissolution

Selective oxidation of methyl α -D-glucoside on carbon supported platinum. III. Catalyst deactivation 47

Epitaxy

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. II. Epitaxy and synergy between γ -Fe₂O₃ and ferrite spinels 131

Ferrite

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. II. Epitaxy and synergy between $\gamma\text{-Fe}_2\text{O}_3$ and ferrite spinels 131

Ferrites

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. I. Preparation of monophasic iron oxides and ferrite spinels and analysis of their mixtures 117

GaH-ZSM-5

Aromatization of short chain alkanes on zeolite catalysts — a Review 1

Gallium active species

Aromatization of short chain alkanes on zeolite catalysts — a Review 1

Gallosilicates

Aromatization of short chain alkanes on zeolite catalysts — a Review 1

Gas chromatography

Trans-but-2-ene is the first hydrocarbon produced in the conversion of methanol to gasoline over zeolite H-ZSM-5 69

Gasoline synthesis

Trans-but-2-ene is the first hydrocarbon produced in the conversion of methanol to gasoline over zeolite H-ZSM-5 69

Glucoside oxidation

Selective oxidation of methyl α -D-glucoside on carbon supported platinum. II. Assessment of the Arrhenius and Langmuir parameters 31

Glucoside oxidation

Selective oxidation of methyl- α -D-glucoside on carbon supported platinum. III. Catalyst deactivation 47

Hematite

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. I. Preparation of monophasic iron oxides and ferrite spinels and analysis of their mixtures 117

Hydrogenation

Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77

Hydrophilicity of ruthenium

Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77

Hydrophobicity of ruthenium

Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77

Infrared spectroscopy

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. II. Epitaxy and synergy between $\gamma\text{-Fe}_2\text{O}_3$ and ferrite spinels 131

Infrared spectroscopy

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. I. Preparation of monophasic iron oxides and ferrite spinels and analysis of their mixtures 117

Iron oxide

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. II. Epitaxy and synergy between $\gamma\text{-Fe}_2\text{O}_3$ and ferrite spinels 131

Kinetics

Selective oxidation of methyl α -D-glucoside on carbon supported platinum. II. Assessment of the Arrhenius and Langmuir parameters 31

Langmuir parameters

Selective oxidation of methyl α -D-glucoside on carbon supported platinum. II. Assessment of the Arrhenius and Langmuir parameters 31

Maghemite

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. II. Epitaxy and synergy between $\gamma\text{-Fe}_2\text{O}_3$ and ferrite spinels 131

Maghemite

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. I. Preparation of monophasic iron oxides and ferrite spinels and analysis of their mixtures 117

Manganese oxide

Oxidative oligomerization of methane to aromatics 103

- Methane oligomerization**
Oxidative oligomerization of methane to aromatics 103
- Methane oxidative coupling**
Characterization of bismuth–manganese catalysts for methane oxidative coupling 169
- Methanol conversion**
Trans-but-2-ene is the first hydrocarbon produced in the conversion of methanol to gasoline over zeolite H-ZSM-5 69
- Methyl α -D-glucoside**
Selective oxidation of methyl α -D-glucoside on carbon supported platinum. II. Assessment of the Arrhenius and Langmuir parameters 31
- Modifiers (salts)**
Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77
- Niobium oxide**
Textural, acidic and catalytic properties of niobium phosphate and of niobium oxide. Influence of the pretreatment temperature 143
- Niobium phosphate**
Textural, acidic and catalytic properties of niobium phosphate and of niobium oxide. Influence of the pretreatment temperature 143
- Oligomerization**
Oxidative oligomerization of methane to aromatics 103
- Oxidation**
Selective oxidation of methyl α -D-glucoside on carbon supported platinum. II. Assessment of the Arrhenius and Langmuir parameters 31
- Oxidation**
Selective oxidation of methyl α -D-glucoside on carbon supported platinum. III. Catalyst deactivation 47
- Oxidative dehydrogenation**
Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. II. Epitaxy and synergy between γ -Fe₂O₃ and ferrite spinels 131
- Oxygen spill-over**
Characterization of bismuth–manganese catalysts for methane oxidative coupling 169
- Palladium**
Effects of calcination program and rehydration on palladium dispersion in zeolites NaY and 5A 155
- Platinum**
Selective oxidation of methyl α -D-glucoside on carbon supported platinum. II. Assessment of the Arrhenius and Langmuir parameters 31
- Platinum**
Selective oxidation of methyl α -D-glucoside on carbon supported platinum. III. Catalyst deactivation 47
- Platinum**
Aromatization of short chain alkanes on zeolite catalysts — a Review 1
- Pore volume**
Textural, acidic and catalytic properties of niobium phosphate and of niobium oxide. Influence of the pretreatment temperature 143
- Pretreatment temperature**
Textural, acidic and catalytic properties of niobium phosphate and of niobium oxide. Influence of the pretreatment temperature 143
- Propane aromatization**
Aromatization of short chain alkanes on zeolite catalysts — a Review 1
- Pt/H-ZSM-5**
Aromatization of short chain alkanes on zeolite catalysts — a Review 1
- Raman spectroscopy**
Effects of calcination program and rehydration on palladium dispersion in zeolites NaY and 5A 155
- Redeposition**
Selective oxidation of methyl α -D-glucoside on carbon supported platinum. III. Catalyst deactivation 47
- Ruthenium**
Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77
- Selective oxidation**
Selective oxidation of methyl α -D-glucoside on carbon supported platinum. II. Assessment of the Arrhenius and Langmuir parameters 31

Selectivity (cyclohexene)

Partial liquid-phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. II. Influence of various salts on the performance of the catalyst 77

Silica

Oxidative oligomerization of methane to aromatics 103

Spinel

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. II. Epitaxy and synergy between $\gamma\text{-Fe}_2\text{O}_3$ and ferrite spinels 131

Spinel

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron complex oxides. I. Preparation of monophasic iron oxides and ferrite spinels and analysis of their mixtures 117

Synergy

Roles of spinel and maghemite phases in the oxidative dehydrogenation of butene over iron

complex oxides. II. Epitaxy and synergy between $\gamma\text{-Fe}_2\text{O}_3$ and ferrite spinels 131

Temperature-programmed reduction

Effects of calcination program and rehydration on palladium dispersion in zeolites NaY and 5A 155

Zeolites

Trans-but-2-ene is the first hydrocarbon produced in the conversion of methanol to gasoline over zeolite H-ZSM-5 69

Zeolites

Effects of calcination program and rehydration on palladium dispersion in zeolites NaY and 5A 155

Zeolites

Aromatization of short chain alkanes on zeolite catalysts — a Review 1

ZSM-5

Trans-but-2-ene is the first hydrocarbon produced in the conversion of methanol to gasoline over zeolite H-ZSM-5 69

ZSM-5

Aromatization of short chain alkanes on zeolite catalysts — a Review 1
